WEBSITE PROJECT REPORT

Vertically joined screenshots with explanations

This report contains three website projects. For each website, the screenshots are joined vertically—one directly below the next, not side by side—so the pages read like a long page. An explanation and key features are included before each joined image.

Project list

1. Movie Review Hub — 2 screenshots
2. ShopEasy — 2 screenshots
3. Spice Garden Restaurant — 6 screenshots

Website 1: Movie Review Hub

Overview

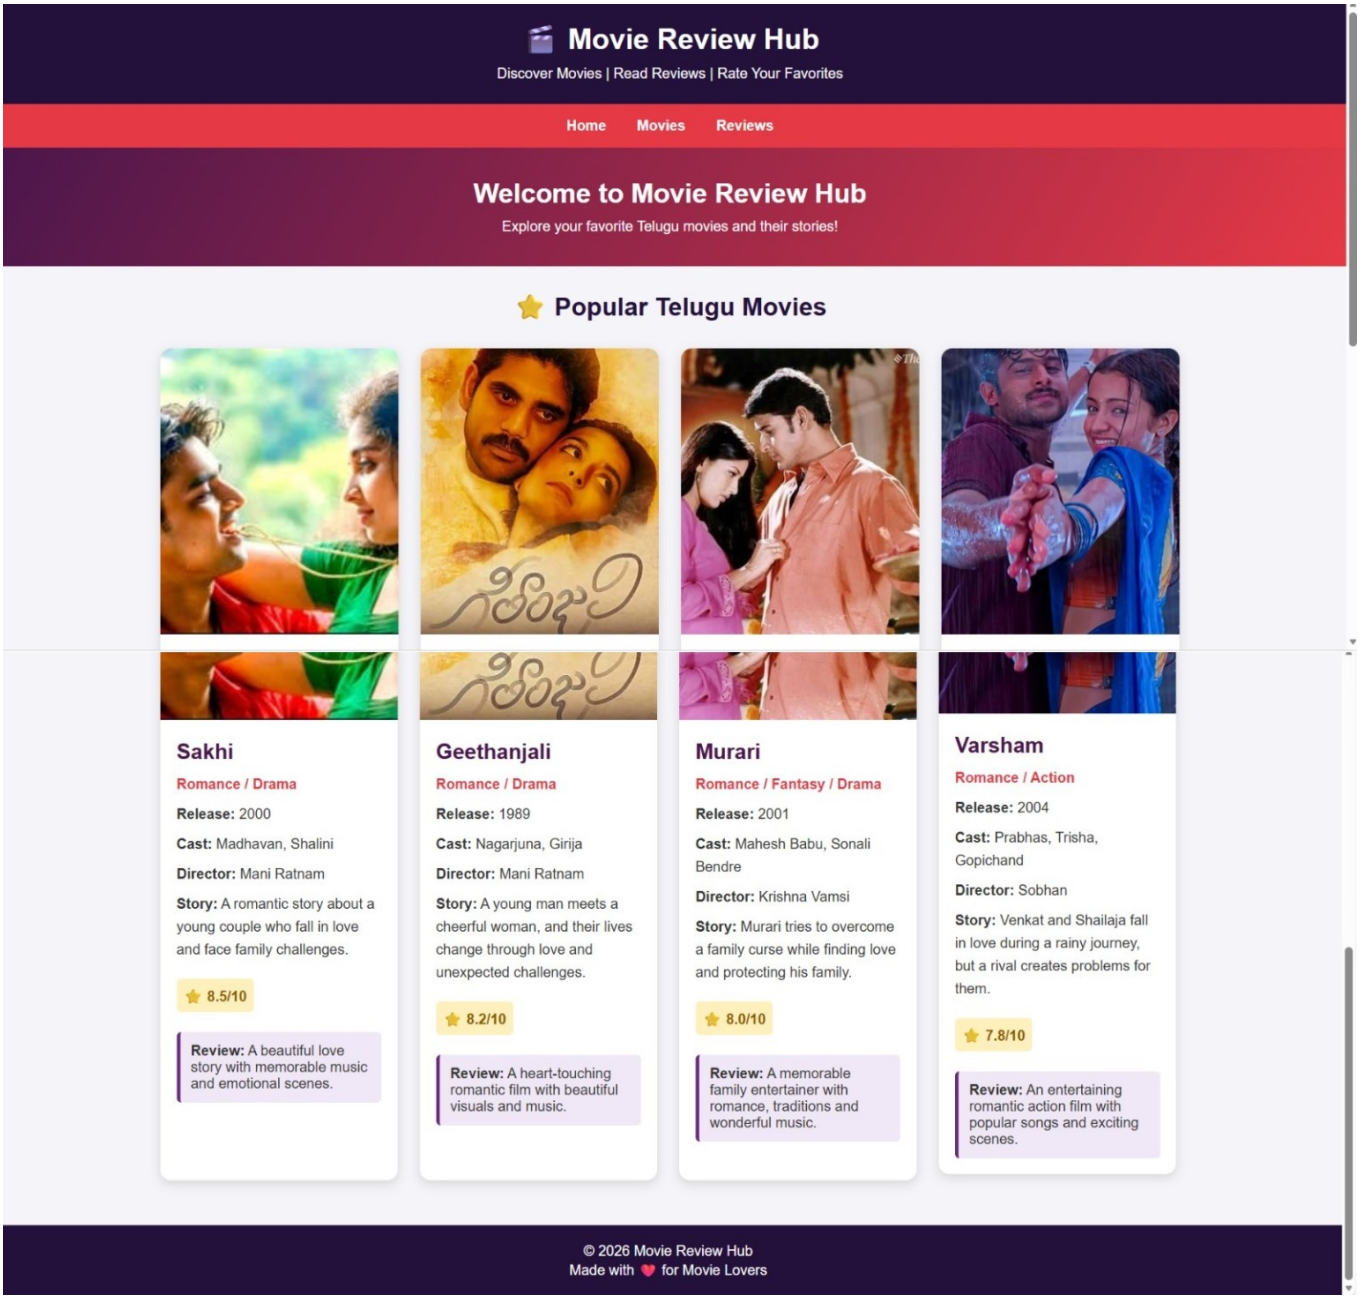

Movie Review Hub is a website for exploring Telugu movies and reading short reviews. Its homepage uses a clear header and navigation menu, followed by a welcome banner and popular-movie cards.

Main features

- Movie cards show posters, genre, release year, cast, director, and a short story summary.
- Ratings out of 10 help visitors compare films, while review boxes provide a quick opinion.
- The purple, red, and white color scheme separates the header, navigation, and content.

Purpose

The main purpose is to help users discover movies and quickly review basic information before deciding what to watch.

Screenshots joined from top to bottom.

Website 2: ShopEasy

Overview

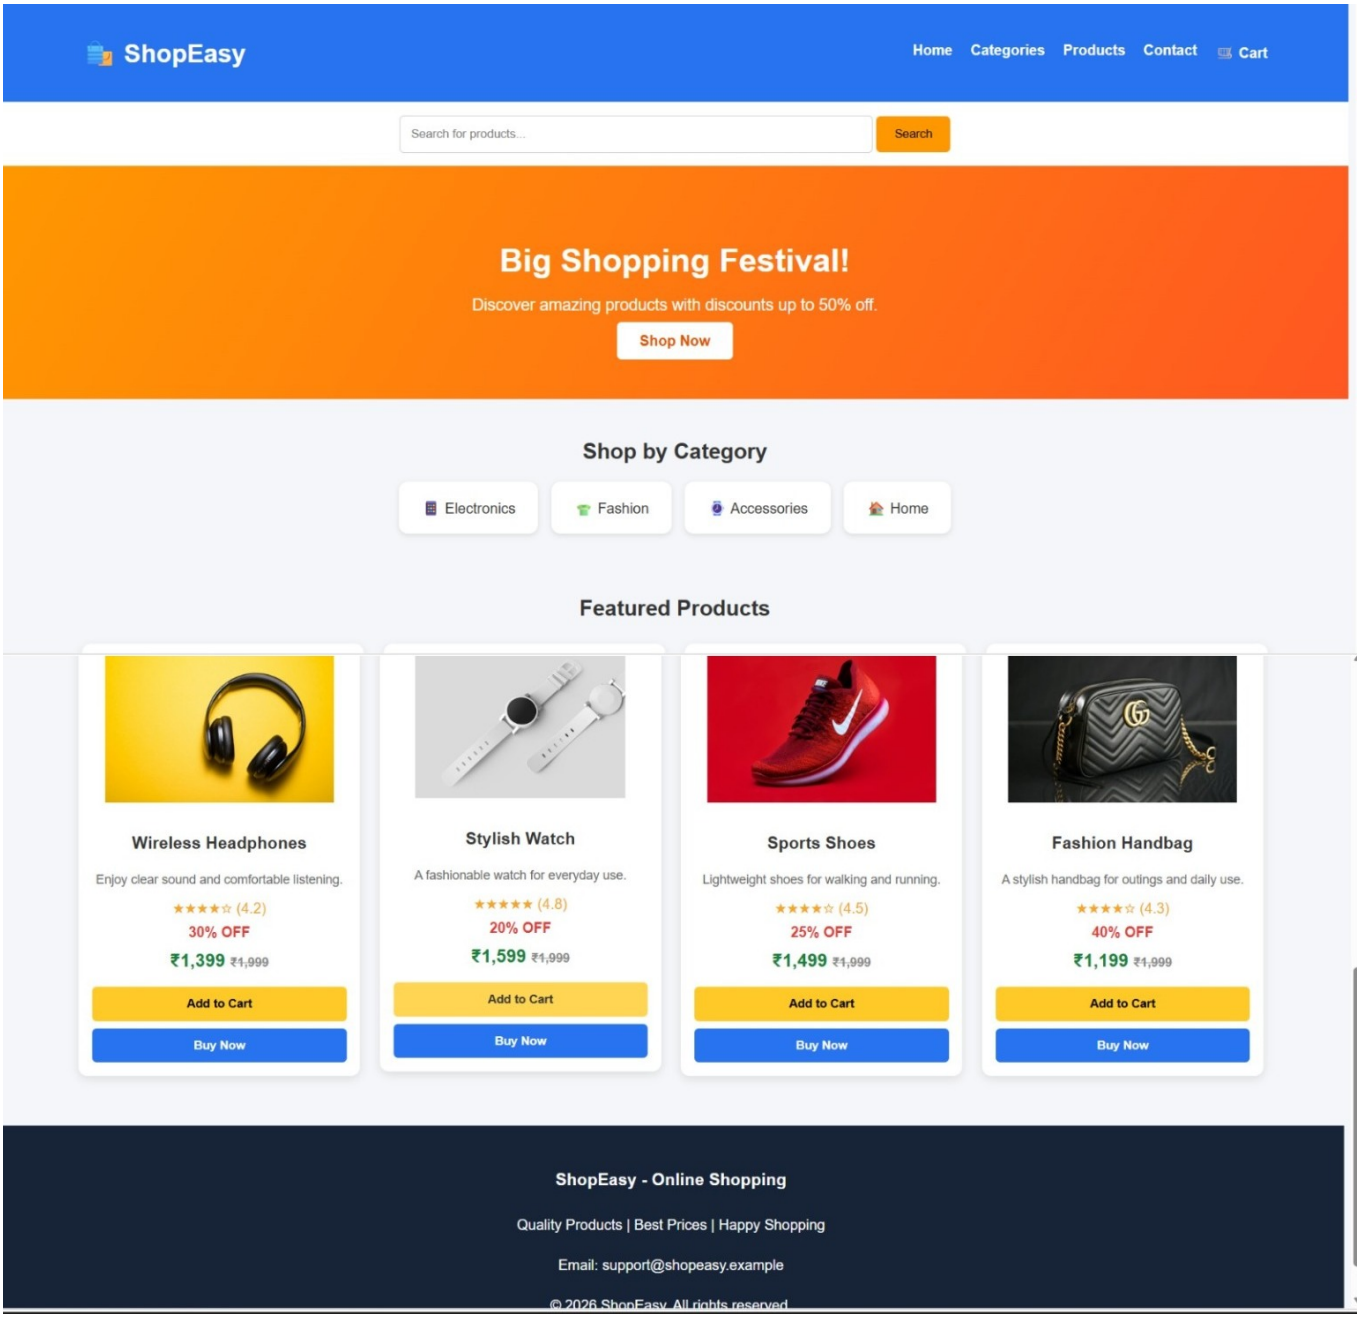

ShopEasy is a simple online-shopping website. It begins with a navigation bar, search field, promotional banner, and category shortcuts, then presents featured products.

Main features

- Search and category links help users find products.
- Product cards include images, ratings, discount percentages, and current and original prices.
- Add to Cart and Buy Now buttons highlight the main shopping actions.

Purpose

The main purpose is to make product browsing and price comparison straightforward and to guide users toward purchasing.

Screenshots joined from top to bottom.

Website 3: Spice Garden Restaurant

Overview

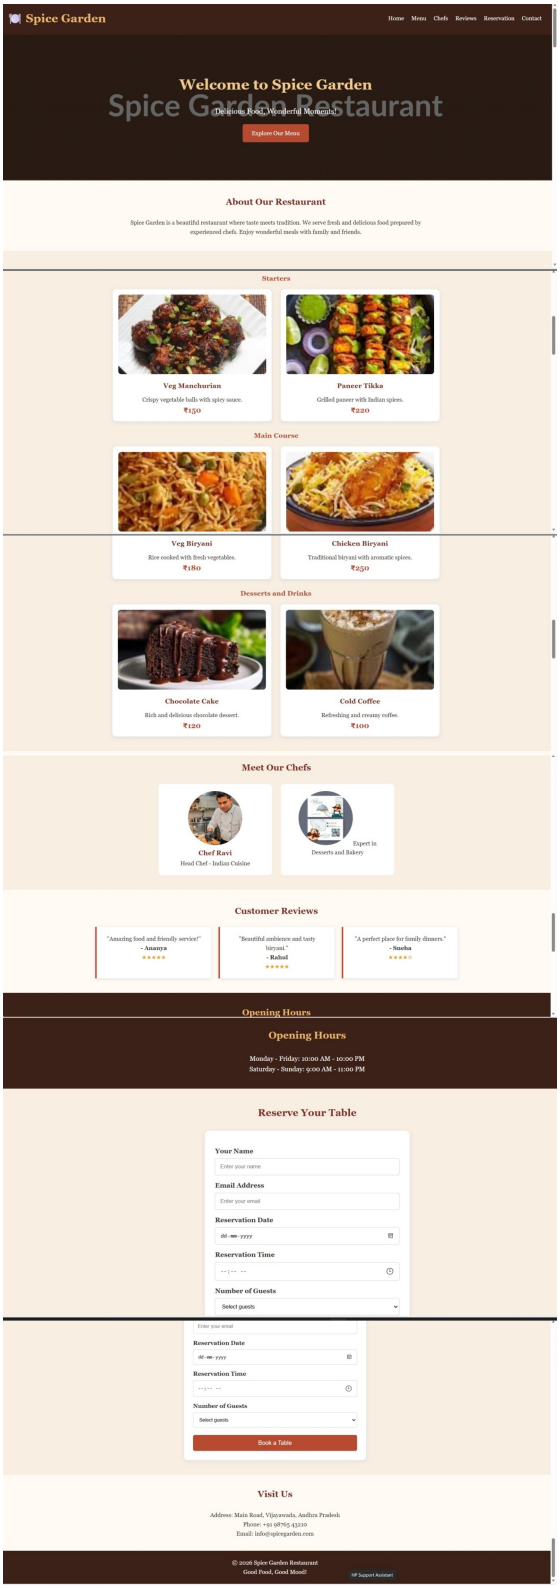

Spice Garden is a restaurant website that introduces the restaurant and helps visitors explore its food and plan a visit. The screenshots show the homepage, menu, chef profiles, customer reviews, opening hours, reservation form, and contact section.

Main features

- Menu items are grouped into starters, main course, and desserts and drinks, with photos, descriptions, and prices.
- Chef profiles and customer reviews give visitors more information about the restaurant.
- Opening hours and a reservation form collect the date, time, guest count, name, and email.
- The contact section provides the restaurant's address, phone number, and email.

Purpose

The main purpose is to promote the restaurant, display menu choices, build confidence through reviews, and make table reservations easier.
